Description Notes Discusses budget increase for contract to University of Nebraska-Lincoln, one of the laboratories where analysis of samples was performed.

Memorandum

DATE: March 20, 1980

TO: Director, Supply Service (134)

FROM: Deputy ACMD for Research and Development (15A)

SUBJ: Contract No. V101(134)P-705

1. Contract No. V101(134)P-705 issued to the University of Nebraska-Lincoln under obligation no. S90068 for \$10,000 was exceeded by \$6,500.

2. This error was due to originally believing that 20 samples were all that were going to be available. An additional 13 samples were obtained and sent for analysis. This was done in order to obtain more reliable results and establish a broader base. Prior approval for increasing the contract was not obtained due to unfamiliarity with VA contract procedures by the person collecting these samples.

3. I am requesting the contract be increased at this time to cover these additional samples. This will be charged to obligation no. S90068.
