EXECUTIVE OFFICE OF THE PRESIDENT  
OFFICE OF SCIENCE AND TECHNOLOGY POLICY

WASHINGTON, D.C. 20500

February 6, 1984

Dear Dr. Huffaker:

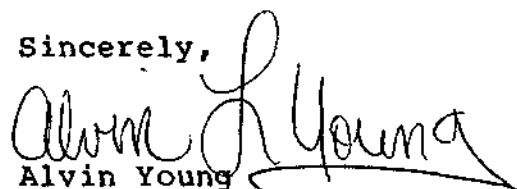

Thank you for the opportunity to provide a final review of the protocols for Binghamton State Office Building (BSOB) activities. I concur with the protocols and with the revised risk assessment. I was pleased to hear that the BSOB experiences and guidelines were of assistance to the San Francisco Health Department.

I hope you will keep us informed of the status of the health surveillance activities. I'm confident that your staff will assess carefully the incorporation of questionable tests until data are available to validate their use. The morbidity phase of the Air Force Health Study, a study of 1200 men heavily exposed to Agent Orange and its associated contaminant 2,3,7,8 TCDD, will be released on February 24, 1984. I'm sure you and your staff will want to review the results in detail. I will make sure you receive a copy of the report.

Effective January 1, 1984, I've joined the staff of the President's Science Advisor. My new address and phone number are as follows: Alvin Young, Senior Policy Analyst for Life Sciences, New Executive Office Building, Room 5005, Washington, D.C. 20506, (202/395-3125).

Best wishes with the BSOB program.

Sincerely,

Alvin Young  
LT COL USAF, Ph.D.  
Senior Policy Analyst  
for Life Sciences

Dr. Robert H. Huffaker  
Associate Director  
Office of Public Health  
The Governor Nelson A. Rockefeller
